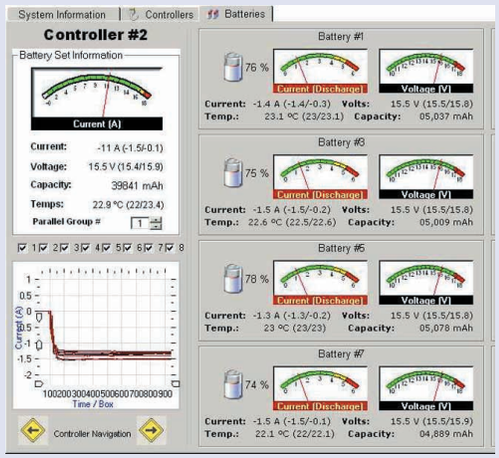
New pre-engineered power system adds Lithium-Ion battery back-up and portability to your OEM equipment so you can

MAKE YOUR NEXT DEVICE BATTERY POWERED

Modular IPBS allows extensive flexibility in package design.



Management firmware utility displays useful power data.

IBPS contains patent-pending technology

Now you can realize the benefits of low-cost lithium-ion battery power in all kinds of OEM equipment, using the new Intelligent Battery and Power System (IBPS) from OceanServer Technology:

- **Modular and scalable**
- **100 to 10,000 WHrs of b**attery power
- **Safely integrate low cost Smart packs**
- **Fully engineered, drop in solution**
- **Regulated DC or raw battery power**
- **High efficiency, up to 95% conversion**
- **Simultaneous charging (DC or wall AC)**
- **Ideal power store for fuel cell or solar**
- **Autonomous operation or RS-232 feed**

Call, email or visit our web site for **low introductory pricing** on IPBS Evaluation Kit (modules, batteries, software and interconnect accessories) to learn hands-on how IBPS can enhance your next design.
